

BOOPATHI K

Java Developer | Java Full Stack Developer

Chennai, Tamil Nadu | +91 98404 22222 | boopathi.k@gmail.com
[linkedin.com/in/boopathi-k-251102335](https://www.linkedin.com/in/boopathi-k-251102335) | github.com/Boopathi2006719

PROFESSIONAL SUMMARY

BCA graduate (2026) seeking entry-level Java Developer / Java Full Stack Developer roles. Hands-on project experience across Java, Spring Boot, React.js, MySQL, REST APIs, JPA, and Hibernate, including designing REST endpoints, integrating relational databases, and testing APIs with Postman. Strong foundation in object-oriented programming, full-stack web development, and database management, with a track record of independently building and deploying complete applications from front end to backend.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Python (basic)

Frontend Development: HTML5, CSS3, JavaScript, React.js

Backend Development: Spring Boot, REST API Design & Development, Java (Core & OOP)

Database: MySQL, SQL, Database Design

ORM / Persistence: JPA, Hibernate

Testing & Tools: Postman (API Testing), Git, GitHub, Maven

IDEs: Eclipse, IntelliJ IDEA, VS Code

Core Strengths: Problem Solving, Communication, Teamwork, Adaptability, Time Management, Quick Learning

PROJECTS

Student Management System

React.js, Spring Boot, MySQL, REST APIs

GitHub: github.com/Boopathi2006719/StudentManagementSystem

- Built a full-stack student-record management web application using React.js for the frontend and Spring Boot for the backend, connected to a MySQL database.
- Designed and implemented RESTful CRUD APIs for managing student records, enabling create, read, update, and delete operations from the React front end.
- Integrated the Spring Boot backend with MySQL for persistent data storage and retrieval, and validated all endpoints using Postman during development.

Flight Booking Management System — Backend

Java 21, Spring Boot, JPA, Hibernate, MySQL

GitHub: github.com/Boopathi2006719/Flight-Booking-Management-System

- Designed and developed a Spring Boot backend with 4 core modules — Airport, Flight, Passenger, and Booking — using Java 21, Spring Data JPA, and Hibernate.
- Built 20 RESTful CRUD endpoints (5 per module: POST, GET all, GET by ID, PUT, DELETE) following REST API design conventions, tested end-to-end using Postman.
- Modeled entity relationships (e.g., Flight-to-Airport, Booking-to-Passenger) using JPA @ManyToOne mappings, with MySQL for persistent storage and Maven for build management.

PROFESSIONAL EXPERIENCE

Artificial Intelligence Intern — Ramesh Systems

- Gained hands-on exposure to Artificial Intelligence and Data Science workflows using Python.
- Learned Python fundamentals, core AI concepts, and introductory data science techniques applied to real datasets.

EDUCATION

Bachelor of Computer Applications (BCA) — Anna University

Computer Science & Engineering (CSE) | CGPA: 7.7/10

Higher Secondary Certificate (HSC)

Government Arts College, Chennai | CGPA: 6.8/10

TRAINING & CERTIFICATIONS

Java Full Stack Development — 2026

Core Java, OOP, Spring Boot, REST APIs, HTML, CSS, JavaScript, React.js, MySQL, JPA, and Hibernate
